

- ★ Hard enamel colors won't be always exactly the same as this chart because these colors made from mineral ore which will be slightly different by the time the ore mined.
- ★ If you insist on keeping the same color all the time, imitation hard enamel & soft enamel colors will be the best choice.
- ★ Color A11 & A227 are not available from Jan. 2014 and will be replaced by other very similar colors from Flower Vase chart.
